

On behalf of the College's 65 U.S. Chapters, I am writing to oppose the proposed regulations governing "unsolicited faxes." The College's Chapters rely on inexpensive methods to communicate with their members regarding education programs. By paying their Chapter dues, these Chapter members expect to receive these types of communications—including those sent via fax. As a result, these faxed communications to Chapter members cannot be considered "unsolicited."

Thank you for the opportunity to comment on these proposed regulations.
